

## Who We Are

Established in 1984, our original focus was on audio visual hire, but due to increasing requests from our clients, we began to focus more on permanent audio visual installation projects. Since 1998, the sole focus of PC Audio Visual has been to meet the need for first-class audio visual installations.

The working owners of the company bring with them over 30 years combined audio visual experience and knowledge.

PC Audio Visual prides itself on providing professional service during both point of sale and installation. We also provide first-class after-sales support, which has allowed us to build long-term relationships with our clients.

PC Audio Visual has the technical and commercial knowledge to design an audio visual solution to meet the set requirements and budget of any given project. We strive to understand your requirements and then design a solution to fulfil your needs.
